

Smart Collection System

As part of the IPS smart technology suite, the Smart Collection System provides a more accurate and efficient process for collecting, counting and reconciling parking meter revenues from IPS Smart Meters. The Smart Collection System offers additional accountability for the collection process, adds transparency to the meter audit, and provides access to collections data from anywhere, at any time, with real-time transmission through wireless communication. The patented IPS cash tracking system gives customers access to additional meter data and provides greater transparency for the collection program in your city.

Features & Benefits

- Wirelessly pairs with IPS Smart Meter to confirm collection and allow meter to transmit collection information to the web-based Data Management System (DMS)
- Counts coins as they are deposited for dual accountability
- Utilizes BLE technology to track collections
- Reports time-stamped data to the DMS for accurate auditing
- Includes a mobile application for system management
- Offers an additional level of accountability through reconciled reports
- Reduces loss with a secure and tamper resistant cash box
- Provides extended life through dual-battery pack technology
- Constructed of lightweight aluminum to maximize collection capacity

Physical Features

SHOCK ABSORBING
FRAME

ADJUSTABLE
HEIGHT HANDLE

WEIGHT CAPACITY
MARKINGS

SECURE, TAMPER
RESISTANT LOCKS

Auditing Capabilities

- Provides automatic levels of assurance—coins are counted when passed through the Smart Meter's coin validator, and when reconciled against bank statements
- Includes an additional optional level of assurance if reconciled with the Smart Collection System DMS report

How to Install*

- ① Replace original cash box head with the Smart Collection System head
- ② Assign Smart Collection System canister to pole using mobile app
- ③ Place new Smart Collection System canister into meter and lock

How to Collect Coins

- ① Remove Smart Collection System Canister from meter
- ② Insert canister into Smart Collection System head and turn to release coin
- ③ Replace Smart Collection System canister into meter and lock

**Smart Collection System is compatible with the single-space M5 Parking Meter with BLE Technology*
